About This Game

It's the year 2112 and the Earth has been depleted of all its resources. Cities are beginning to crumble as the Earth's crust is collapsing under their weight. Scientists e 5d3b920ae0

Title: Colony
Genre: Casual, Simulation
Developer:
Jamie Cunningham
Publisher:
Varitech
Release Date: 29 Nov, 2016

English

Couldn't figure out how to close the menus and the build menu covers 1/4 of the screen. Maybe make it slightly translucent at least? Very small resolution and maximizing the window makes everything blurry (on 1440p display anyways). I like the concept

though. Just needs more work to improve the game experience. There is no tutorial but you can goof around and figure some stuff out. Feels more like a demo than a game. Maybe 2\$ is worth that to some people but not for me.. 10/10 Going to rewatch Antz now.. Couldn't figure out how to close the menus and the build menu covers 1/4 of the screen. Maybe make it slightly translucent at least? Very small resolution and maximizing the window makes everything blurry (on 1440p display anyways). I like the concept though. Just needs more work to improve the game experience. There is no tutorial but you can goof around and figure some stuff out. Feels more like a demo than a game. Maybe 2\$ is worth that to some people but not for me.. Fun little side game. Alien encounters are neat, combining elements is fun. Well worth the price.. 10/10 Going to rewatch Antz now.. Flew for about 10 minutes in a straight line thinking I'd eventually find something but I didn't, you can't do a full 360 "up/down" either, it sends space into a spinning motion as you hit the limit. (I'm thinking about 180 degrees, 90 up 90 down from 0.) So, don't know if it's good or not as I never found anything, properly boring it was though. maybe you're lucky enough to reach something and it then turns out to be a great game, 10 minutes of holding spacebar and nothing else is not enough to make me want to play more though.. How do i craftu2665u2665u2665u2665u2665u2665???????????????????? srsly i cant do anything beside take over planets and run out of energy / fuel??? Edit:Where?. This Game is not even worth the dollar, sure you can fly around in a spaceship but the controls are clunky and there is no way to turn 360 degrees so you can go back to the planet you just flew past. In addition though I've only played for about 10 mins it is quite clear to me that there is little to no point of actually colonizing planets(the whole point of the game). In conclusion it simply seems that this game, while an amazing concept, has been executed astoundingly poorly and is rather underfunded. If there was a major update to the game which was not a paid DLC I would be more than happy to altar my review based on the new gamplay added.. The game is confusing and it doesn't have a tutorial
